

Release Notes

DocAve 4.1.5.1000 Release Notes Release Date: October 12, 2007

- **Production Name:** 4.1.5.1000
- **Release Date:** October 12, 2007
- **Package List:** Patch packages

Bug Fixes

- **Bug 3808**
Item level restore cannot restore files bigger than 10Mb.

Resolved Issues and Enhancements

- **Backup and Restore**
 - **#151: MOSS 2007 Item Level**
Description:
Restoring of entire list creates 2 default views.
 - **#168: MOSS 2007 Item Level**
Description:
If Issue ID is not consistent, the issue number will show as the ID number rather than the real item number after restored.
 - **#200: MOSS 2007 Item Level**
Description:
Bread crumb trail is broken when using item level back and restore to promote a subsite into a top level site.
 - **#205: MOSS 2007 Item Level**
Description:
Restore job completed with errors when performing an out of place restore for an excel document.
 - **#171: MOSS 2007 Item Level**
Description:
DocAve GUI for Out of Place Restore does not display the Destination in full text.
- **Archiver**
 - **#103: SP 2003 Archiver**
Description:

User received message "Access is Denied" when trying to restore a file by clicking on the archived document stub. Also while the Archiver executable "AveSP2003ArchBackup.exe" is still running, there was no data being sent to the Media server, the Archiver job hangs at 11%.

- **#165: SP 2003 Archiver**
Description:
Customer received configuration error while trying to enable SP 2003 Archiver.
- **#175: SP 2003 Archiver**
Description:
Archiver Job Detail Report does not list the names of the files archived. It lists the names of the sites and folders only.
- **#202: SP 2003 and MOSS 2007 Archiver**
Description:
Scheduled Job Monitor View for Archiver was missing from v4.1.4.2041.
- **Migrator**
 - **#150: SP 2003 to MOSS 2007 Migrator**
Description:
Migrating site groups from SP 2003 to MOSS 2007, the group owner is set to System Account.
 - **#155: SP 2003 to MOSS 2007 Migrator**
Description:
Migrator failed to migrate documents that are in the root document library level in SP 2003 to folder 3 levels deep on the MOSS 2007 document library.
 - **#170: SP 2003 to MOSS 2007 Migrator**
Description:
Migrating of Issue lists with history from SP 2003 to MOSS 2007, the history of the issue in SP2003 became individual issues in MOSS 2007.
 - **#201: SP 2003 to MOSS 2007 Migrator**
Description:
Migrator failed to migrate Meeting Workspace from SP 2003 to MOSS 2007.
- **Trashbin**
 - **#186: Trashbin**
Description:
Received error Message:"Cannot find the list: Document Library. Please create the list or restore the whole list", when restoring documents from portal site sub-area.
 - **#197: TrashBin**
Description:
Server experience 100% (High) CPU usage after Trashbin webpart is added to about 20 sub-areas.
- **Auditor**
 - **#210: Auditor**
Description:
DocAve GUI will freeze (lock up) when accessing SP Auditor and received the error message on the DocAve GUI "No Data Receive From Server".

Known Issues

- **Archiver**
 - **MOSS 2007 Archiver**
 - Description:
Archiver failed to archive more than 100,000 files in one plan. There is no issue archiving less than 100,000 files in one plan.
- **SPDR-PR (Platform Recovery)**
 - **SPDR-PR**
 - Description:
User Permission issues related to SSO Users, Domain users and Kerberos authentication users.
